

ENVIRONMENTAL POLICY STATEMENT

TG Eakin Limited manufactures Ostomy and Wound Care products in Comber, Northern Ireland and supply the market via selected distributors throughout the world. Our focus will always be on great service, quality, innovation, ethical and environmental performance and being socially responsible in all we do. The excellence of our products bring significant use and care benefits to end users, and we are proud of our contribution to this personal well-being and dignity.

TG Eakin is committed to and operates a robust Environmental Management System (EMS) in compliance with BS EN ISO14001:2004.

We understand the impact our business has on the environment and we have identified significant aspects which include but are not limited to:

- Minimising waste produced in our operations

- Being cognizant of waste management for the end of product life

- Segregating and Recycling waste from our manufacturing operations

- Being efficient in our use of energy resources for all our operations - manufacture through to distribution

- The careful storage, use and handling of any necessary chemicals, ozone depleting substances and liquids which have potential to cause pollution

- Ensuring that those working on our behalf adhere to the high standards we maintain ourselves

The management of these significant aspects is documented within our EMS.

We will continuously improve environmental performance based on the targets and objectives set by the management. We are committed to prevention of pollution as a result of our activities, reducing the level of waste and emissions that arise as a result of the normal day to day business activities of the company.

We are committed to complying with all relevant environmental legislation, regulations and other requirements as they arise. The company recognise that legislative requirements and industry codes of practice are a minimum level of performance and it is the intention of the company to exceed these requirements as a matter of course.

We recognise the importance of training and education of environmental management controls to all employees across our business; it is integral to our EMS that staff understand the impact they have as individuals, and the impact their actions have on the environmental performance of the organisation and indeed the sustainability of the planet itself.

We will monitor our progress and review our environmental performance on an annual basis.

We will communicate this policy statement to all employees and all persons working on behalf of the company. The policy will also be made available to all via the company website: www.eakin.eu

This policy will be the subject of annual top level Management Review and updated periodically.
